DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 1. Claims 1-15 are rejected under 35 U.S.C. 102(a) as being anticipated by Dupont (Dupont; U.S. Patent Number 5,729,542).

Regarding claims 1, 8 and 12, Dupont discloses a method / apparatus and means for transmitting and receiving data in a code division multiple access telecommunication system (column 2 line 60 to column 3 line 31, figure 1), comprising the steps of providing a random access time window (figure 6, column 20) comprising a plurality of random access slots for transmitting random access data from at least one first communication device to a second communication device, dividing the plurality of random access slots of the random access time window into at least two groups (column 5 line 60 to column 6 line 44), and allocating the groups to respective priority classes, whereby the priority classes represent the transmission priorities of the random access data to be transmitted in the random access slots (column 5, line 60 to column 7 line 8, figure 6).

Art Unit: 2681

•

Regarding **claims 2, 13**, Dupont further teaches that the transmission priorities of the random access data to be transmitted are determined on the basis of the content and the type of the random access data (abstract, column 2 lines 40-59).

Regarding **claims 3, 14**, Dupont further teaches that the number of random access slots in each group is variably set depending on system requirements (abstract, column 2 lines 40-59, column 6 line 45 to column 7 line 8).

Regarding **claim 4**, Dupont further teaches the first communication device, for transmitting random access data of a certain transmission priority, randomly chooses one or more random access slots from the group having the corresponding priority class (column 6 line 45 to column 7 line 8).

Regarding **claims 5, 9**, Dupont further teaches that the access probability depends on the number of random access slots in the group (claim 8).

Regarding **claims 6, 10**, Dupont further teaches that said second communication device periodically broadcasts information defining the groups of the random access time window to the at least one first communication device (column 1 line 53 to column 2 line 8, column 3 lines 32-61).

Regarding **claims 7, 11, 15**, Dupont further teaches that each random access slot in said random access time window is defined by a time offset value and a preamble code (figures 5-6).

Art Unit: 2681

Citation of Pertinent Prior Art

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Inventor	Publication	Number	Disclosure
Rikkinen et al.	US Patent	6,037,827	Method for radio resource control.
Scholefield	US Patent	5,742,592	Method for communicating data in a
et al.			wireless communication system.
Jurgensen et	US	201/0036113	Prioritization method for users
al.	Publication	A1	randomly accessing a common communication channel.
Kornprobst	US	201/0026539	Event triggered change of access
et al.	Publication	A1	service class in a random access channel.

Conclusion

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for formal communications intended for entry, for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sonny Trinh whose telephone number is (703) 305-1961. The examiner can normally be reached Monday through Thursdays from 7:00 am to 4:00 p.m., and on alternate Fridays.

Art Unit: 2681
